Professional Summary of Research Interests and Expertise

I am a highly motivated and passionate bioinformatician, data scientist and researcher naturally driven by curiosity to use mathematical, statistical and computational methods to answer fundamental and applied research questions in biodiversity science, evolutionary biology, ecology, genomics and bioinformatics, particularly related to molecular species identification and discovery through DNA barcoding and other DNA-based approaches.

Education

Doctor of Philosophy (PhD.), Computational Sciences

2016-Present

University of Guelph

- Thesis title: A Novel Statistical Framework for Assessment of Intraspecific Haplotype Sampling Completeness
- Cumulative GPA: 90%

Advisor: Dr. Daniel J. Gillis, School of Computer Science

Co-Advisor: Dr. Robert H. Hanner, Department of Integrative Biology

Committee: Dr. Deborah Stacey, School of Computer Science
Dr. Graham Taylor, School of Engineering

An Introduction to Interactive Programming in Python

2014

Rice University

- Online course through Coursera on the development of interactive applications in Python
- Grade received: 98.4%

Master of Bioinformatics (MBinf.)

2013-2014

University of Guelph

- Primary coursework in bioinformatics, data science, statistics, and machine learning within the R Statistical Computing Environment
- Major research project title: Assessing haplotype sampling efficiency in Actinopterygii using DNA barcodes
- Cumulative GPA: 85.8%

Advisor: Dr. Robert H. Hanner, Department of Integrative Biology

Co-Advisor: Dr. Daniel A. Ashlock, Department of Mathematics and Statistics

Introduction to DNA Barcoding

2013

University of Guelph

- Online course through the Open Learning and Education Support (OpenEd)
- Grade received: 97.0%

Honors Bachelor of Science (BSc. (Hons.)) Biological Science

2009-2013

University of Guelph

- Primary coursework in bioinformatics, evolutionary biology, ecology, mathematics and statistics

Research Experience**Summer Research Assistant**

2016

Algoma University

Antunes Plant and Soil Ecology Lab, Department of Biology

Invasive Species Research Institute (ISRI)

- Offered bioinformatics and statistical analysis support in R
- Assisted Principal Investigator and undergraduate thesis student with initial drafting of a manuscript on invasive plant root lesion quantification

Lab Assistant Volunteer

2014-2016

Algoma University

Antunes Plant and Soil Ecology Lab, Department of Biology

Invasive Species Research Institute (ISRI)

- Offered bioinformatics and statistical analysis support in R
- Assisted with collaborative and outreach initiatives for the Terrestrial Invasive Plant Species (TIPS) Network Project through drafting communication letters to public and private conservation agencies across Canada and the USA seeking volunteers to collect invasive plant species for root lesion quantification

Undergraduate Research Assistant

2013

University of Guelph

Monteiro Vaccine Discovery Research Group

- Performed various experimental techniques (gas chromatography-mass spectrometry (GC-MS) and Nuclear Magnetic Resonance (NMR)) on bacterial polysaccharide samples

for vaccine synthesis and development under the supervision of qualified graduate students

Teaching Experience

Graduate Teaching Assistant (GTA)	2016-2020
University of Guelph	
CIS*3130 – System Modelling and Simulation	2020
~ 30 students · Python	
CIS*1910 – Discrete Structures in Computing I	2017
~ 300 students (~ 40 students per section)	
CIS*2460 – Modelling of Computer Systems	2016-2019
~ 60 students · R, Excel, Java	

Undergraduate Student Supervision

I have directly supervised and mentored several undergraduate students in computer science and integrative biology, all of whom are coauthors on my publications. My primary role has been to guide students through the entire scientific process (i.e., formulating research questions, designing and setting up experiments to test hypotheses, collecting data and analyzing results and writing the manuscript drafts). Students completed research both as part of a course and as lab volunteers.

Academic Peer Review Service

I have served as a reviewer for 9 manuscripts in 4 different journals, both alone or under the guidance of my PhD. supervisors.

<i>Ecology and Evolution</i>	2021-2022
<i>Molecular Ecology Resources</i>	2019-2022
<i>Molecular Biology Reports</i>	2020
<i>Methods in Ecology and Evolution</i>	2020

Proceedings

I have presented graduate research at 3 international conferences, including both oral presentations and posters.

8th International Barcode of Life Conference	2019
NTNU University Museum and Norwegian Biodiversity Information Centre	
7th International Barcode of Life Conference	2017
University of Johannesburg	
6th International Barcode of Life Conference	2015
University of Guelph

R Shiny

Software Development

HACSim (**H**aplotype **A**ccumulation **C**urve **S**imulator) · R package · R Shiny web app

- A novel nonparametric stochastic (Monte Carlo) local search optimization method of iteratively generating species' haplotype accumulation curves through extrapolation to assess within-species sampling completeness
- Available for download through the Comprehensive R Archive Network ([CRAN](https://cran.r-project.org/)) package repository and accessible online at shinyapps.io
- Publication in *PeerJ Computer Science* was one of the top five most viewed papers in the category *Optimization Theory and Computation*
- Has been downloaded over 14000 times (c. 245 times per month) since being published in May 2019

Volunteer Experience

1. Wireframing session volunteer

November 2021

University of Guelph

- Participated in student-led use case app prototype demonstrations for CIS*3750 – System Analysis and Design in Applications
- Graded students based on several factors via Qualtrics surveys
